Work experience

AI Consultant – Freelance May 2025 – present
As part of KPS Financial Lab's MicroLabX project, I develop autonomous AI agents for businesses.

AI Trainer – Freelance Nov 2024 – present
I teach lessons and courses for companies and high schools on generative AI: its history, its tools and its applications in education and in the workplace.

Co-founder at **StudyBuddy** Jan 2023 – present
The all-in-one app for university students. I am responsible for administration, business development, marketing and design.

Mechanical Design Intern at **ARM SpA** Jun 2024 – Sep 2024
Internship as a mechanical designer at an aluminium foundry, focused on computational fluid dynamics (CFD).

Education

Mechanical Engineering Bachelor's Degree, University of Brescia 2018 – 2024
High School Diploma Liceo Copernico, Brescia 2013 – 2018

Projects

Physical activity data analysis
For my bachelor's thesis, I carried out an in-depth analysis of data collected by fitness-tracking apps used by several people, with the aim of optimising the battery pack design of a self-balancing wheelchair for people with disabilities.

Awards

Winner, NOI Hackathon 2023: CabChat Project page
In just 24 hours, my team and I built a voice interface for taxi drivers that understands unstructured text from voice messages, using a Telegram bot as the front end.

Certifications

Certified AI Trainer – AIFIA 2025
English, C1 level – IELTS 2018

Skills

Technical skills	SolidWorks, C, MATLAB, Python, OpenFOAM, OpenClaw, Linux
